The price of greater life is death In an age of exploding stars and other cataclysmic galactic events in which Homo sapiens has long since split into different kinds, Mallory Ringess becomes a pilot of the Order of Mystic Mathematicians and Other Seekers of the Ineffable Flame. His quest to find the Elder Eddas - nothing less than the secret of life embroidered in humanity s oldest DNA - will lead him from Neverness s streets of colored ice into the deadly manifold, the space beneath space whose topology writhes and twists with hideous complexity like a nest of psychedelic snakes. Journeying in his lightship The Immanent Carnation far across the Milky Way, Mallory enters the Solid State Entity, a nebula-sized brain composed of moonlike biocomputers analogous to neurons. There is he tested; there he asks about the Ieldra, a mythical race of aliens said to have seeded the galaxy with its DNA eons before and to have initiated the evolutionary cycle. Mallory returns to Neverness with the conviction that the Elder Eddas may be found among the Alaloi tribes, whose genes have been back-mutated to give the Alaloi the appearance of Neanderthals. A continuation of Mallory s quest will take him to these ancient people and see him bludgeoned to death, cryogenically frozen, then resurrected as half man, half biocomputer - kin of sorts to the Solid State Entity. In the war that follows, he will be asked to discard the last vestiges of humanity in return for mankind s ultimate salvation. Only in the novel s final pages will Mallory finally grasp the infinite possibilities of evolution and thereby change the course of the universe...
