Reviews

This publication is wonderful. I have got study and so i am confident that i am going to likely to read once again once more down the road. Its been designed in an exceedingly straightforward way which is only soon after i finished reading this ebook by which actually altered me, change the way i think.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 362 pages. Dimensions: 9.7in. x 7.4in. x 0.8in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . . . stars were discovered by MM. Wolf and Rayet, in 1867 at the Paris Observatory, in the constellation Cygnus. M. Respighi, in 1871 at Madras, found that γ Argus has a similar spectrum. Professor E. C. Pickering discovered three others, at Cambridge, while sweeping for gaseous nebulas with a telescope provided with a spectroscopic eye-piece. By the same method Dr. Copeland, at Puno, Peru, detected five more; and at Dun Edit, using an object-glass prism, he found a sixth. The astronomers of Harvard College Observatory have the great credit of discovering forty-two stars of this type since 1888. They were found, for the most part by Mrs. M. Fleming, bmeans of the bright bands in their photographed spectra on the Henry Draper Memorial plates. The photographs were made at Cambridge and in Peru. Communicated by the author. The fifty-five Wolf-Rayet stars now known are arranged in the order of their right accensions in Table I, with their catalogue numbers and magnitudes in the second and third columns. The anonymous star No. 54 was observed here, and I estimated its magnitude at 10. The discoverer of each star is noted in the last column. (W. -R. Wolf-Rayet; R. Respighi; P. Pickering; C. Copeland; H. C. O. Harvard College Observatory) Professor Pickering has pointed out that all these stars are near the central line of the Milky Way, and have a tendency to occur in groups. By assuming the position of the North Pole of the Galaxy...
