aPress, United States, 2007. Paperback. Condition: New. 1st ed.. Language: English . Brand New Book ***** Print on Demand *****.This book addresses the market demand of novice programmers to learn about, and build, networked applications - a subject very often omitted from traditional computer programming books. The book brings cutting-edge technologies such as GPS communication, Bluetooth and Radio Frequency ID (RFID) within reach of the mass-market. The 2.0 Framework and 2.0 Compact Framework provide a number of APIs for communicating through these technologies and this book demonstrates these in the form of a number of practical projects that readers can undertake to build their own network additions.
