

Industrial Wastewater Treatment : An Engineering process Optimization

By Kemal Z. Mohammed

LAP Lambert Acad. Publ. Okt 2011, 2011. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - The effects of pollution from industries on the receiving environment are manifold and depend on the type of pollutant and concentration: ranges from aesthetic quality reduction to toxic metal bioaccumulation that in the long run is suspected of causing cancer. Pollutants released from tannery are rich in carcinogenic chromium (VI). These industries should have to handle toxic pollutants either by recycling valuable components back to production processes, by altering it in to non toxic form or by safely dumping it in an engineered landfill. The treatment of chrome can be carried out by applying physical, chemical or biological unit processes. In this work three different waste treatment processes were applied, Low cost Biosorption using Eucalyptus tree bark, Coffee husk and saw dust , Precipitation process using leftover cement dust and finally by Membrane separation technology : The state of the art technology. The engineering optimization process employs statistical design tools to limit the number of runs, to establish the combination of parameters for each experimental run and to pinpoint optimum treatment efficiency whereby best process operating variables are...

Reviews

The publication is easy in read through safer to comprehend. It is actually loaded with wisdom and knowledge Its been printed in an extremely simple way and is particularly simply right after i finished reading through this pdf where actually modified me, affect the way i believe.

-- **Ms. Clementina Cole V**

This is the very best publication i have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer create this pdf.
